

Analise a [aula gravada](#) e replique as funcionalidades para Fornecedor , criando:

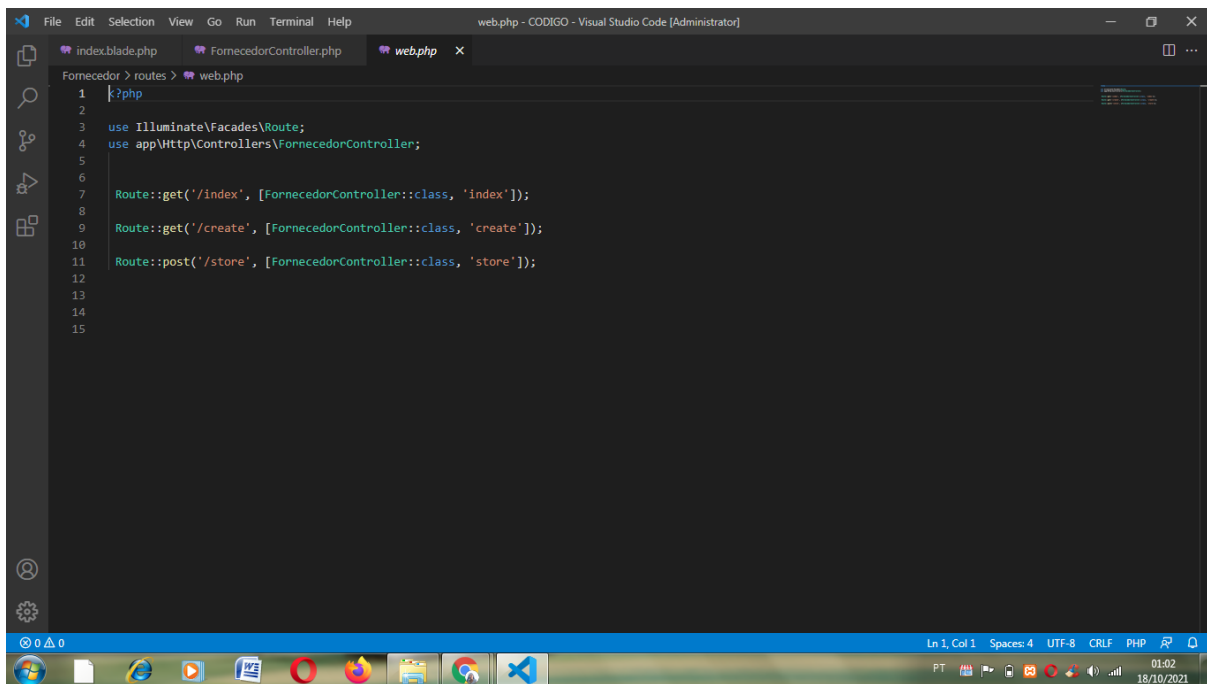

1 - Criar Rotas (create e store)

2 - Criar View(fornecedor.create)

Entrega: dia 18-10-21 às 18:00

Valor: 1,0

****seguir padrão do GiT e criar Branch atividade III**

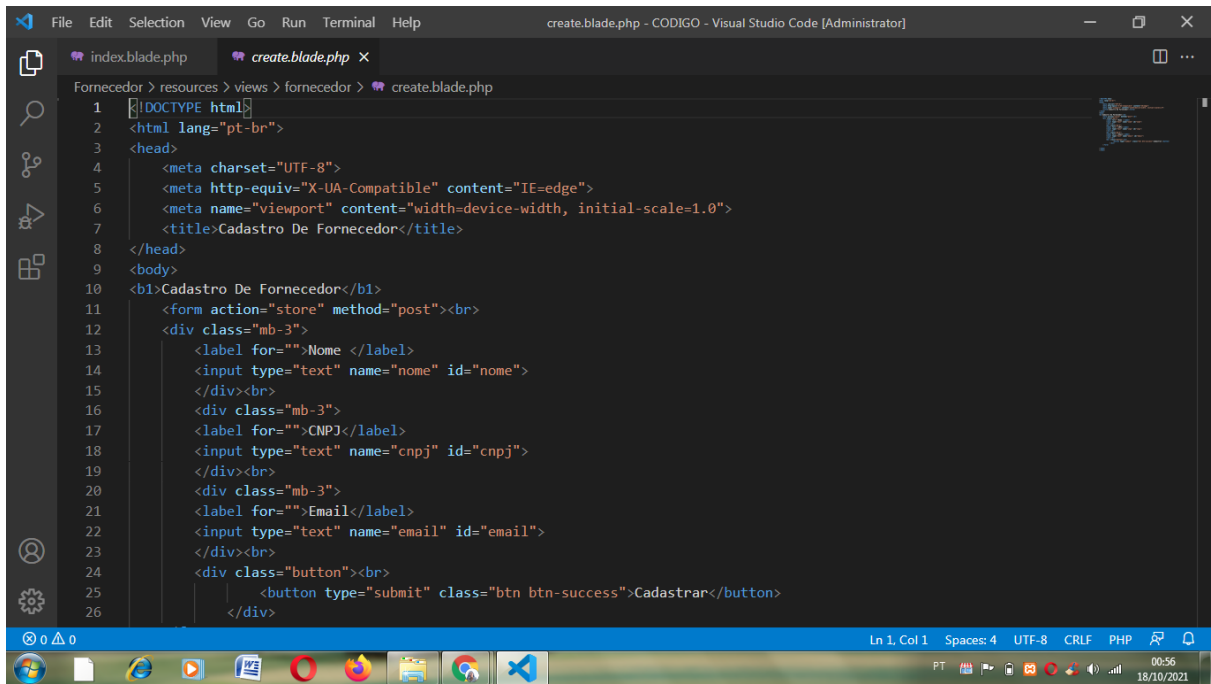

The screenshot shows the Visual Studio Code editor with the file 'web.php' open. The code defines routes for a 'Fornecedor' resource. The file explorer on the left shows the project structure with 'index.blade.php', 'FornecedorController.php', and 'web.php'. The code in 'web.php' is as follows:

```
1  <?php
2
3  use Illuminate\Facades\Route;
4  use app\Http\Controllers\FornecedorController;
5
6
7  Route::get('/index', [FornecedorController::class, 'index']);
8
9  Route::get('/create', [FornecedorController::class, 'create']);
10
11 Route::post('/store', [FornecedorController::class, 'store']);
12
13
14
15
```

The status bar at the bottom indicates the current position is Line 1, Column 1, with 4 spaces, using UTF-8 encoding, CRLF line endings, and the PHP language mode. The system clock shows 01:02 on 18/10/2021.
